Geomancy: The most accurate divination technique?

The author of this Zine has been
empirically testing this system
since 2024, having performed
dozens and dozens of readings.

Geomancy divination, as
compared to a system like Tarot,
is simple, with only 16 Geomantic
figures. Tarot on the other hand,
contains 78 pictorial keys.

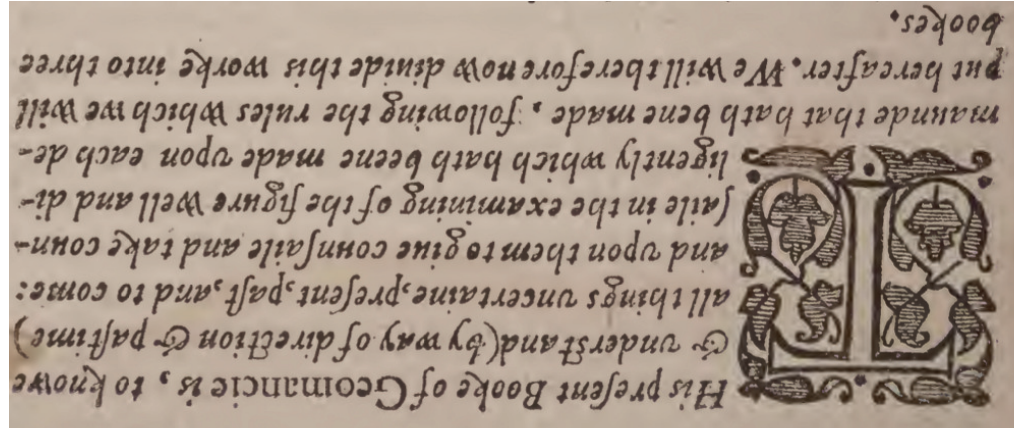

Sirian Sage, has been using
Geomancy Divination since 2024
and now teaches it to others, so
they may test its accuracy for
themselves.

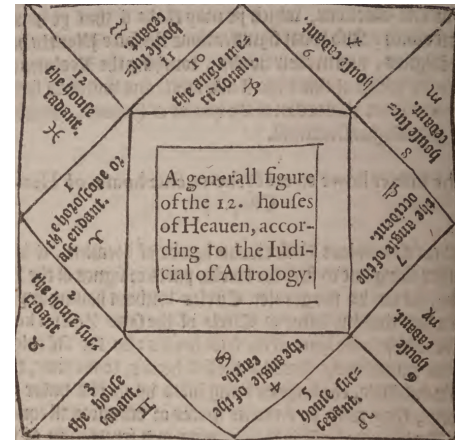

Geomancy divination is an
ancient technique originating
from Africa and the Middle
East.

Geomancy was popularized
during the European
Renaissance era, and used by
some of the wealthiest and most
powerful people of the time,
though it was used by the
working class hundreds of
years before then.

This system of divination was so
powerful, even the Holy Roman
Emperor, King Wenceslaus, was
devoted to it.
Geomancy was later banned by
the Roman Catholic Church.

One of Geomancy's most
prolific practitioners, Heinrich
Cornelius Agrippa, claimed
Geomancy to be the "most
accurate divination technique."

Geomancy became immensely
popular among all social classes
during the middle ages, and
came to be known as the
"Daughter of Astrology."
